RS COOKWARE PVT. LTD.

Introduction

RS COOKWARE Pvt. Ltd. is a manufacturer of premium quality pressure cookers, non-stick cookware and hard anodized cookware in INDIA with the brand name of "BESTECH".

Kitchen cookware is essential for good cooking, that's why BESTECH has brought together one of the most comprehensive ranges of quality cookware. It has everything that you could possibly need.

The most thorough research and development, the most careful selection of materials, the best manufacturing practices and the strictest quality control - all go into making cookware for you, which are trusted by millions of families.

We offer products that are needed, well-designed, well-made and reasonably priced with different finish: hard anodized, heat resistant paint, nonstick finish, hammer tone coating. This high technology helps us meeting all the requirement of the customers.

Our determination to please customers, drives the kind of product we deliver by promoting the investments in the customer based requirement. Thus, results in satisfied customers in India and other countries. Our attempt to transform our best ideas into reality forms the basis of our word. The word where the quest for perfection, and indomitable spirit to achieve goals against all odds dominates our thought process.

By combining the advanced engineering technology with a smart sense of styling, RS COOKWARE Pvt. Ltd. has produced an expanding range of products known for their quality and durability. Our cookware website will help you select the cookware, that's right for your individual need.

Cooking

Hard anodized finish makes the surface
harder than stainless steel.

Hard Anodized Cookware

What is Hard Anodizing

Hard anodizing was first developed by Russian scientists to produce a metal surface tough enough for space travel. The same technology is now used by Bestech to make its Hard Anodized pressure cookers and cookware. Through a process of electrolysis at sub-zero temperature using a high intensity electric current, a 60 micron thick layer of aluminium oxide (Al_2O_3) is formed. This process produces a surface harder than steel with wonderful properties for cooking.

The Hard Anodized surface is non-toxic, non-staining and non-reactive with foods. It is thermally-efficient, heats fast and evenly and is not spoiled by high heat. It is tough and durable, will not tarnish or corrode and will stay looking new for years.

Hard Anodized (Induction)

DUAL PURPOSE

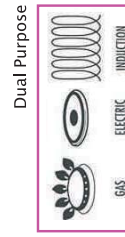

Cook & Serve
Size : 2/ 3ltr.

Deep Kadai
Size : 2/ 3/4ltr.

Taper Fry Pan
Size : 27cm

Dual Purpose

Straight Fry Pan
Size : 23cm

Non-Stick Cookware

Benefits of Non-Stick Cooking

If you want to cook with less or no oil or butter, Bestech Nonstick Cookware is the cookware to use. Foods which tend to stick to the pan while cooking are best cooked in Bestech Nonstick. Also, cleaning is so easy! Bestech Nonstick Cookware will give you great taste, healthy food, cooked easily and economically. If you are new to cooking, you will find the Bestech instruction manuals and recipes invaluable. Even if you are an expert cook, you will learn new ways to get the best out of your Bestech Nonstick Cookware.
